

### **SUSTAIN E+ has become to an end**

The Sustain E+ project, aimed at supporting professionals working with ERASMUS+ and other EU funded initiatives to develop more sustainable and greener projects, has become to an end.

As a last activity, each partner has organised a multiplier event aimed at introducing the project results to the public, and to present the main outputs of this project:

- The Erasmus+ projects and their environmental impact tool evaluation and the green badge (so-called self-evaluation tool  
<https://sustaineplus.erasmus.site/it/auto-evaluation-tool/>);
- The Sustain E+ training path, aimed at transferring knowledge and tools for design and managing projects in an environmental sustainable way  
(<https://sustaineplus.erasmus.site/training-development/>)
- The Sustain E+ social training platform  
(<https://sustaineplus.erasmus.site/platform/login>)

Each event, held at each partner' cities (2 in Spain, 1 in Italy, 1 in Poland, 1 in Greece), saw the participation of at least 30 persons, deeply interested in the topics of the event, as collected from the submitted survey so far.

The participants were: project managers and administrative personnel from organisations participating in European projects, freelance consultants, youth students, project officers and evaluators.

Attendees confirmed that SUSTAIN E+ project made them aware about the need for considering the sustainability as a key aspect in a project design, and the information provided will help them develop more sustainable projects in the future.

**...but the project  
hasn't really  
ended**

The tools are and will be still available for consultation and use:

- The self-evaluation tool for evaluating the sustainable performance of your EU project and for receiving the sustainable project badge.
- The social training platform where you can find a course explaining the best practices that everyone can implement from the very beginning when designing a project and for conducting practical activities and exercises and a forum to share lessons learnt with other ERASMUS+ professionals.
- The partners will continue to collaborate in a fruitful way, exploiting SUSTAIN E+ results over other European projects in order to enlarge the Erasmus + sustainable community.
- And we invite you to regularly enter our website and check our social networks for any updates!

**We encourage you to think about the role you want to play and take action!**

We invite you to regularly enter our website and check our social networks for new updates on the upcoming launch of this course!
